

## Claims

1. A golf putter including

(a) a head;

(b) a shaft including a proximate end attached to said head and a distal end, said  
5 distal end including a grip;

said head including

(c) a forward portion including a face for striking a golf ball; and,

(d) a wing portion extending rearwardly from said forward portion and movable  
between at least two operative positions

10 (i) a first operative position, and

(ii) a second operative position laterally displaced along said forward portion  
in a direction outwardly away from said proximate end of said shaft to  
alter the heel-to-toe weight distribution of the putter.

15 2. A golf putter including

(a) a head including

(i) a forward portion including a face for striking a golf ball; and,

(ii) a wing portion extending rearwardly from said forward portion and  
movable between at least two operative positions

20 a first operative position, and

a second operative position laterally displaced along said forward  
portion to alter the heel-to-toe weight distribution of the putter;

and,

- (b) a shaft including a proximate end attached to said wing portion and a distal end, said distal end including a grip.

3. A golf putter including

5 (a) a head; and,

- (b) a shaft including a proximate end attached to said head and a distal end, said distal end including a grip, said distal end being movable between at least two operative positions on said head.
